TECHNOLOGY NEWS

The first quarter went by so quickly. I am happy to say in our computer lab we also are moving along quickly. Our four year olds were a little hesitant at first but it didn't take them long to be actively involved and guided to direct their own learning on the computer. This quarter the four year olds will continue to work on letter recognition and naming the letters and sounds through various activities. Also, listening to stories while following with the mouse from left to right. In math they will still be working on numbers 1-10, shapes and colors.

Traditional Kindergarten and Kindergarten also are moving right along. We are waiting for Santa to bring us six new computers and a printer so we will be able to achieve all our goals and go way beyond the state standards, especially in using the keyboard to type words, sentences and short stories. In the meantime we will continue to study the keyboard and work on understanding that printed material provides information, understand the concept of printed words, letters and spacing between words. they will be reading play, fiction and nonfiction, stories, comics, folk tales, Greek myths and Chinese fables on kindergarten level. Along with math activities 1-10, and 1-100.

I greatly appreciate all the kind words you have told me about the computer program and lab. As I said before, it is a great privilege and responsibility to be your child's computer teacher. My prayer is that we together strive to develop all their talents and potential.

Sincerely,

Mrs. Judie Albanese
